# APPLICATION LIST

## Description

The AutoTEC is an advanced hand held scan tool which plugs into the vehicle's diagnostic socket much like a conventional scan tool. All software is contained on a single CompactFlash™ card which can remain neatly plugged into the unit. Also all pods and adaptors have been eliminated – making the tool even easier to use.

- ▶ **Unlike 'some' companies we do not make false claims – our application list tries to be as accurate as possible!**
- ▶ **No hidden costs with Extra Pods, Leads or CAN Adaptors required for general operation of the scan tool**
- ▶ **NEW!!! 3 Year extended warrantee for piece of mind**
- ▶ **1<sup>ST</sup> Class technical support by phone or e-mail**

## Application List Summery

MANUFACTURER	FROM	TO	CODE	INFORMATION
ACURA	2000	2004	NO
